Current status of 5G base stations in the Solomon Islands

Overview

How many mobile connections are there in the Solomon Islands?

Data from GSMA Intelligence shows that there were 547 thousand cellular mobile connections in the Solomon Islands at the beginning of 2025. For perspective, many people make use of more than one mobile connection, so it's not unusual for mobile connection figures to significantly exceed figures for total population.

What mobile services are available in the Solomon Islands?

Mobile services have continually expanded in the Solomon Islands. 3G services became available in 2010, leading to an increase in mobile broadband uptake. Solomon Islands currently host three ISPs: Solomon Telekom, Bmobile and SATSOL.

What are the ISPs in the Solomon Islands?

Solomon Islands currently host three ISPs: Solomon Telekom, Bmobile and SATSOL. Fixed broadband services which underpin the development of a digital economy are largely limited to government, corporations, and educational organisations in the Solomon Islands.

What is the role of fixed broadband in the Solomon Islands?

Fixed broadband services which underpin the development of a digital economy are largely limited to government, corporations, and educational organisations in the Solomon Islands. Telecommunication infrastructure in the Solomon Islands requires significant investment due to the geographical make-up of the islands.

How big is Facebook's ad reach in the Solomon Islands?

And for additional context, Facebook's ad reach in the Solomon Islands was equivalent to 49.3 percent of the local internet user base (regardless of age) in January 2025. At the beginning of 2025, 47.0 percent of Facebook's ad

audience in the Solomon Islands was female, while 53.0 percent was male.
