# Côte d'Ivoire protects hybrid energy for national communication base stations

## Overview

---

Why did Côte d'Ivoire become a leading electricity exporter in West Africa?

Those tough years nevertheless provided Côte d'Ivoire with an opportunity to find a unique, innovative energy solution, paving the way for the country to develop the third largest electricity generation system on the continent and become one of the leading electricity exporters in West Africa.

Does Côte d'Ivoire allow private investment in energy production?

Côte d'Ivoire framework has allowed private investment in energy production since the 1980s and as of 2021 three IPPs are active (Azito Energie, Aggreko and Ciprel).

Can decentralized solar mini grids support energy access in Côte d'Ivoire?

The study is determining the viability of building and operating decentralized solar mini grids to support energy access for up to 100 unelectrified communities comprising 190,000 persons in Côte d'Ivoire. The MMPE is implementing the project through its Direction Générale de l'Énergie.

Why did Côte d'Ivoire privatize its electricity sector?

Côte d'Ivoire's decision to privatize a portion of its electricity sector paved the way for one of the continent's most robust energy systems that continues to expand and innovate with clean energy solutions. This feat would not have been possible without private sector involvement and complex financial packages.

Does coqivoire have a power grid?

The grid is expected to cover 99% of the population by 2035, and 42% of the energy produced will come from renewable sources. That is reassuring news for Coqivoire. In the wake of the post-electoral crisis of 2011, only 34% of the population had access to electricity. Today, close to 94% of Ivorians are connected to the power grid.

What is Côte d'Ivoire energy?

Côte d'Ivoire Energies (CI-ENERGIES): the state-owned entity responsible for monitoring and managing the electricity system. It also manage projects for which the state acts as the conceding authority.
