

SolarInvert Energy Solutions

Danish independent hybrid energy storage construction project

Overview

Will Eurowind energy develop a battery energy storage system?

Together with BOS Power Eurowind Energy will develop and install one of Denmark's largest battery energy storage systems (BESS) as part of an advanced hybrid power plant.

Where is better energy deploying its first battery storage project?

Developer Better Energy is deploying its first major battery storage project, a 10MW/12MWh system, at one of its solar PV plants in Denmark.

What is a co-located solar and wind hybrid Park?

The co-located solar and wind hybrid park has a capacity of 84,8 MW, with an annual production of 186.000.000 kWh per year. The integration of the 45 MWh battery energy storage system will further enhance grid flexibility and stability, ensuring seamless renewable energy integration.
