

## SolarInvert Energy Solutions

# Danish outdoor power supply large capacity battery

## Overview

---

Does European energy have a battery storage project in Denmark?

European Energy breaks ground on battery storage in Denmark together with Kragerup Estate. Project to provide operational experience for European Energy in integration of battery solutions. Copenhagen, Denmark, 20th of January 2025 – European Energy has started on its first large-scale battery storage project.

Is Eurowind launching a battery energy storage system in Denmark?

Eurowind Energy has announced the development of one of Denmark's largest Battery Energy Storage Systems (BESS), in collaboration with BOS Power. The project will be integrated at Eurowind's 84.8MW GreenLab Skive hybrid solar and wind facility, marking a significant step in the country's renewable energy landscape.

Who will build Energinet battery plant in Denmark?

BOS Power will serve as the system integrator for the project, delivering a 45MWh, two-hour battery system. Eurowind Energy will oversee the construction of the plant. The facility is expected to be operational by the end of 2025, providing essential ancillary and frequency control services to Denmark's transmission system operator, Energinet.

How will a battery help balance the power grid in Denmark?

In addition, the battery will offer crucial system services to help balance the power grid in eastern Denmark. It will store surplus renewable energy during periods of high production and supply it back to the grid when demand is high, improving overall energy efficiency.

What is European energy's new battery storage project?

This is done in collaboration with Kragerup Estate. This is the first battery storage project that European Energy has undertaken in Denmark, and it will

provide valuable operational experience in integrating battery solutions with the grid for the company.

Why should European Energy Invest in battery storage?

With the installation of a state-of-the-art battery, European Energy is positioned to enhance the stability and resilience of the electricity grid. “Battery storage is a key component in the development of future energy projects.
