# Djibouti energy storage product tariffs

## Overview

---

How is energy used in Djibouti?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

What is the current state of electricity in Djibouti?

Electricity sector: Current state □Djibouti's electricity supply is based on : □Thermal generation (diesel and heavy fuel oil): 20-40%. □Hydroelectric imports from Ethiopia (since 2011): 60-80%. o The country's current energy production is 220 MW, broken down as follows □Public generation of 120 MW by EdD.

What are the different types of energy transformation in Djibouti?

One of the most important types of transformation for the energy system is the refining of crude oil into oil products, such as the fuels that power automobiles, ships and planes. No data for Djibouti for 2021. Another important form of transformation is the generation of electricity.

Which cargo is subject to auction in Djibouti?

Cargos subject to auction are local and transit cargos only. Public auction is managed by the Djibouti Ports and Free Zones Authority (DPFZA) and all rules, procedures and regulations related to the auction process are under DPFZA's jurisdiction. 221. MAGASINS GÉNÉRAUX (MG).

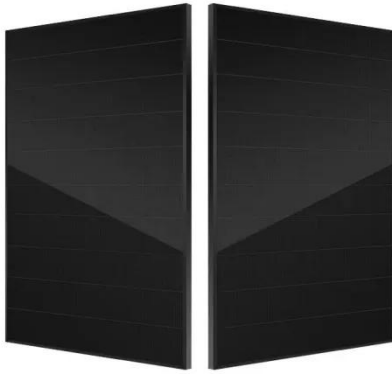

What is happening in Djibouti in 2021?

No data for Djibouti for 2021. Another important form of transformation is the generation of electricity. Thermal power plants generate electricity by harnessing the heat of burning fuels or nuclear reactions – during which up to half of their energy content is lost.

Who manages public auctions in Djibouti?

Public auction is managed by the Djibouti Ports and Free Zones Authority (DPFZA) and all rules, procedures and regulations related to the auction process are under DPFZA's jurisdiction. 221. MAGASINS GÉNÉRAUX (MG) All containers remaining at the Operator's Facility for 80 days or more will be eligible for transfer to Magasins Généraux.
