

## SolarInvert Energy Solutions

# Does Sweden produce outdoor power supplies

## Overview

---

Majority of electricity production in Sweden relies on hydro power and nuclear power. In 2008 the consumption of electricity in Sweden was 16018 kWh per capita, compared to EU average 7409 kWh per capita. Sweden has a national grid, which is part of the Synchronous grid of Northern Europe. A specialty of the Swedish energy system is the existence of so-called "block" power plants, which are used for peak load.

How much electricity does Sweden use?

Majority of electricity production in Sweden relies on hydro power and nuclear power. In 2008 the consumption of electricity in Sweden was 16 018 kWh per capita, compared to EU average 7409 kWh per capita. Sweden has a national grid, which is part of the Synchronous grid of Northern Europe.

What percentage of Sweden's electricity comes from renewable sources?

In 2022, more than 60 per cent of Sweden's electricity came from renewable sources. The government's energy policies have also promoted the use of renewable energy. The Electricity Certificate System – a market-based support system for renewable electricity production – is one example.

How does Sweden use energy?

In Stockholm, the body heat from commuters passing through Stockholm Central Station is used to heat a nearby building, and in the southern town of Växjö, there are passive high-rises. More than half of the energy used in Sweden comes from renewable energy sources. Find out more about Sweden's energy use.

Is there a power grid in Sweden?

In Central Sweden, there is also a single-phase AC power grid operated with 16.7 Hz frequency for power supply of electric railways, see Electric power supply system of railways in Sweden. Sweden is subdivided into four price areas: Malmö (SE4), Stockholm (SE3), Sundsvall (SE2) and Luleå (SE1) (as of winter 2015).

How much wind power does Sweden use?

According to the Swedish National Action Plan (2010) for the European Union 2009 Renewable Energy Directive the Swedish government plan is 8% wind power of electricity (12.5 TWh) in 2020. The Swedish Energy Agency recommended in 2007 a target of 30 TWh of wind power in 2020. The annual electricity use was in average 146 TWh in 2000-2009.

Does Sweden have a nuclear power plant?

Sweden currently has three nuclear plants with six nuclear reactors in operation. In 2022, some 19 per cent of Sweden's electricity came from wind power. Combined heat and power (CHP) plants – mainly powered by biofuels – accounted for around 9 per cent of the electricity output. Sweden is wise to draw energy from the forest.
