Does the photovoltaic tariff affect inverters

Overview

How will April tariffs affect inverters & solar panels?

Overall, while the solar panel price spike is the most pronounced effect of the April tariffs, inverters are seeing a noticeable cost increase as well, on the order of a few cents per watt.

Will solar tariffs affect the solar industry?

Tariffs coming into effect tomorrow will certainly impact the industry, but the stockpiles are likely to reduce the impact and give homeowners more time to go solar this year without price increases or with smaller price increases.

Is the solar industry insulated from tariffs?

Although the cost to install solar in the United States is higher than elsewhere in the developed world, the industry continues to grow in the U.S. The good news is that there has been significant investment in solar manufacturing in the U.S., so the industry is somewhat insulated from the impact of tariffs.

What are the 'reciprocal day' tariffs affecting solar panels?

Updated April 29, 2025: In addition to the “Reciprocal Day” tariffs (see updates below), the solar industry learned the final determination on rates for the anti-dumping, countervailing duty (AD/CVD) case affecting crystalline silicon cells and solar panel imports from Cambodia, Malaysia, Vietnam and Thailand in late April.

Do solar panels have a tariff?

In 2014, tariffs were expanded to solar panels assembled using Chinese or Taiwanese cells regardless of country of origin (U.S. ITA 2014, 2015). In 2018, a 30% tariff was imposed on all major solar product exporters to the U.S. (U.S. President 2018; U.S. Trade Representative 2019). This tariff declined 5% each year to reach 15% by 2021.

Which solar companies do not incur import tariffs?

Other “Domestic” Suppliers: A few manufacturers with U.S.-based production or assembly – such as Hanwha Qcells (Georgia factories), First Solar (Ohio), Mission Solar (Texas), and Silfab (Washington) – do not incur these import tariffs on their U.S.-made panels. They have an effective price advantage now.

Does the photovoltaic tariff affect inverters

How Will Tariffs Impact the Cost to Go Solar in 2025?

There's a lot of talk about tariffs these days and as consumers are considering going solar it's important to understand what the impact of tariffs might be for the solar industry.
