**Doesn't France use base stations for communication**

## Overview

---

France currently has 4 mobile networks, , , and all of which are licensed for UMTS. All except Free are also licensed for GSM. In 2016 Q3, Orange had 28.966 million mobile phone customers, SFR had 14.577 million, Bouygues had 12.660 million, Free Mobile had 12.385 million, and the MVNOs had 7.281 million. Before the launch of Free Mobile in January 2012, the number of physical mobile phone operato.

Does France have a telephone system?

France is served by an extensive system of automatic telephone exchanges connected by modern networks of fiber-optic cable, coaxial cable, microwave radio relay, and a domestic satellite system; cellular telephone service is widely available, expanding rapidly, and includes roaming service to foreign countries.

Are mobile-phone base stations a source of exposure to electromagnetic fields?

Mobile-phone base stations antennas are the dominant source of exposure to electromagnetic fields in surrounding housing. Indoor exposure was influenced by the position of the windows with respect to the antenna and the floor of the building. Personal electric field measurements showed higher values during trips than at home.

How many mobile networks are there in France?

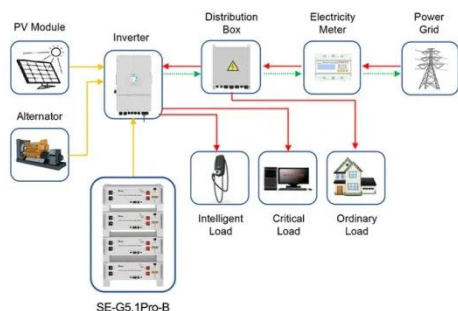

France currently has 4 mobile networks, Orange, SFR, Bouygues Telecom and Free all of which are licensed for UMTS. All except Free are also licensed for GSM. In 2016 Q3, Orange had 28.966 million mobile phone customers, SFR had 14.577 million, Bouygues had 12.660 million, Free Mobile had 12.385 million, and the MVNOs had 7.281 million.

How many UMTS networks are there in France?

Internet users: 45.262 million; 44.625 million (metropolitan France) (2009)  
France currently has 4 mobile networks, Orange, SFR, Bouygues Telecom and Free all of which are licensed for UMTS. All except Free are also licensed for

GSM.
