

SolarInvert Energy Solutions

Dominican Photovoltaic Energy Storage Company

Overview

Is photovoltaic technology right for the Dominican Republic?

Here, too, photovoltaic technology is the method of choice. As the largest solar park in the Caribbean with a total capacity of 116 MW (phase I - 58 MW, phase II - 58 MW), the Montecristi solar park has laid the foundation for a sustainable turnaround in energy policy in the Dominican Republic.

What is the installed capacity of photovoltaic energy in the Dominican Republic?

The installed capacity of photovoltaic energy in the Dominican Republic is 0.43 GW. 5. Photovoltaic energy in the Dominican Republic is increasing rapidly and could 1. Introduction currently a topic of high priority and relevance worldwide. Among these strategies are those that lead to the reduction of greenhouse gases (GHG) .

Why did the Dominican Republic build a photovoltaic plant?

The energy deficit and dependence on fossil fuels drove the Dominican Republic to step up its commitment to clean energy. DOMINION took on the task of building the photovoltaic plant in this Caribbean country, with an offer that included everything from the design and construction of the plant to its operation and subsequent maintenance.
