

SolarInvert Energy Solutions

Double-glass module market capacity

Overview

The double glass PV module market, currently valued at approximately \$22,060 million in 2025, is experiencing robust growth, projected to expand at a compound annual growth rate (CAGR) of 13.1% from 2025 to 2033. This significant growth is driven by several key factors. What is the global double glass module Photovoltaic Glass market value?

The global double glass module photovoltaic glass market is projected to reach a value of USD 29.5 billion by 2033, exhibiting a CAGR of 11.5% during the forecast period from 2025 to 2033.

Where is double glass module Photovoltaic Glass used?

The Asia-Pacific region is the largest market for double glass module photovoltaic glass, accounting for over 60% of the global market share. The key countries in the region include China, India, and Japan.

What are the different types of double glass module Photovoltaic Glass?

Monocrystalline silicon and polycrystalline silicon are the primary types of double glass module photovoltaic glass, with monocrystalline silicon dominating the market due to its higher efficiency and lifespan. Key market players include Canadian Solar, Hanwha, Neosun Energy, Sharp, AE Solar, and Amerisolar.
