

## SolarInvert Energy Solutions

# Dutch home stacked energy storage

## Overview

---

Do Dutch home battery purchases keep driving battery storage installations?

Dutch home battery purchases keep driving battery storage installations. According to Dutch New Energy Research's Nationaal Smart Storage Trendrapport 24/25, 410 MWh of new battery capacity was installed in the Netherlands in 2023 - 1 MWh is enough to power a couple hundred homes for a day.

Are all energy storage facilities in the Netherlands electro-chemical?

All energy storage facilities in the Netherlands are electro-chemical, with the exception of the contracted 1 MW Hydrostar underwater compressed air energy storage project in Aruba (Caribbean). Hydrostar is a Canadian company specializing in underwater compressed air energy storage technologies.

Are battery energy storage installations limiting the deployment of battery energy systems?

While lengthy authorization processes are limiting the deployment of battery energy storage installations (BESS), the lion's share of purchased battery systems is in the residential sector. In fact, the paper shows that 98% of the Dutch installations are small ones (less than 20 kWh).
