# EMS building for Iraqi communication base stations

## Overview

---

The continues to have a number of temporary military bases in , most a type of (FOB). The US and Iraq were set in January 2024 to begin negotiations to end US military presence in Iraq.

Why is Iraq acquiring modern tactical radio systems?

According to the commanding general, M-6, Directorate of Communications, Command and Control, Iraqi Ministry of Defense, this equipment is not sufficient to meet the army's needs so the service is in the process of acquiring modern tactical radio systems.

Does the US have a military base in Iraq?

The United States Department of Defense continues to have a number of temporary military bases in Iraq, most a type of forward operating base (FOB). The US and Iraq were set in January 2024 to begin negotiations to end US military presence in Iraq.

Who is responsible for establishing a tactical communications infrastructure in Iraq?

Establishing the army's tactical communications infrastructure and training the personnel to operate it are the responsibility of Maj. Gen. Ahmed Saad, IA, commanding general, M-6 (U.S. Army G-6 equivalent), Directorate of Communications, Command and Control, Iraqi Ministry of Defense, Baghdad.

What improvements are being made to Iraq's communications infrastructure?

Improvements to the communications infrastructure in Iraq involve work on land and water. Soldiers from the 57th Signal Battalion and A/111th Signal Battalion pull fiber optic cable at Al Faw Palace Lake.

Does Iraq need HF communications equipment?

Besides needing tactical HF systems, the Iraqi army currently lacks very high frequency (VHF) spectrum communications equipment. Gen. Saad notes that there is an open tender to supply the first phases of VHF and ultrahigh

frequency (UHF) communications networks in the country.

Does Iraq have a communications training school?

The Iraqi army has established a communications training school to provide its formations with dedicated signals specialists. The school currently is operating on an accelerated schedule to train the thousands of soldiers necessary to operate and maintain its communications infrastructure.
