

SolarInvert Energy Solutions

Egyptian energy storage battery manufacturing company

Overview

AMEA Power is building Egypt's first battery energy storage systems to boost grid stability and increase the role of renewable energy in Egypt's energy mix. How did EIC become the first energy store in Egypt?

EIC became the first essential source of energy stores in Egypt by leveraging foreign expertise to develop the local market. EIC focused on adopting the latest technologies, including Lithium Batteries and started operating in New Markets like UAE and Portugal.

Will Egypt build a microgrid?

Earlier this year, state-owned utility Egyptian Electricity Holding Co. held an expressions-of-interest tender for the design, construction and operation of a 8.2 MW solar plant and 2 MW/4MWh battery energy storage system, which would be built at the site of an existing microgrid in western Egypt.

What makes EIC a great battery company?

EIC is one of the largest companies in the battery field with all types and capabilities in the Middle East, as it is the sole representative of a group of the largest European, American, and British manufacturers of batteries in the world because of its great history in this area.
