

SolarInvert Energy Solutions

Energy storage and charging station installation in Bosnia and Herzegovina

Overview

Electric power generation is a key sector of economic activity in BiH. Electric power is primarily generated in coal-fired thermal and large-scale hydro power plants and the country is a net exporter of electrical energy. The generating capacity is about 17,000 GWh. BiH historically had a comparative advantage in electricity.

BiH's electrical grid has suffered from decades of neglected maintenance and a lack of investment. The European Bank for Reconstruction and Development.
