Energy storage prices in Denmark

Overview

Should Denmark invest in energy storage?

Denmark has already invested in energy storage technologies, but there is room for expansion in these areas. By investing in energy storage, Denmark could improve the reliability of its wind energy supply and reduce the need for backup power from conventional power plants. Increased collaboration with neighboring countries.

Can energy storage units be installed in the Danish power system?

Elsystemansvar A/S (subsidiary of Energinet) has asked Ea Energy Analyses to analyse the benefits and main drivers for the installation of storage units in the Danish power system. This will supplement the technology aspects in the recent Technology Catalogue on Energy Storage (DEA and Energinet, 2019).

Where can I find the price of energy in Denmark?

In Statbank Denmark, you can find the price payable to the energy company, the price incl. network costs, the price incl. non-recoverable taxes and the price incl. paid taxes and VAT. The price of North Sea oil is also available. Go to the statbank How much do private consumers and businesses pay for electricity and natural gas?

.

How much does electricity cost in Denmark?

According to Nord Pool power exchange data, Denmark's average wholesale electricity price in 2020 was 27.13 EUR/MWh (or approximately 32.78 USD/MWh). This was lower than the average price in many other European countries, such as Germany (41.58 EUR/MWh) and the United Kingdom (43.07 EUR/MWh).

How are energy services delivered in Denmark?

Some of the services are delivered through energy markets in Denmark (they are referenced in each of the subsections); certain are remunerated in other countries, e.g. in the US, or are not linked to any compensation at all.

Are there opportunities for value-stacking in Danish electricity markets?

After going over the main features of the Danish electricity markets – with a focus on the provision of ancillary services – opportunities for value-stacking (utilizing opportunities across markets) are identified and examined for the year 2025 at the transmission grid level.
