

SolarInvert Energy Solutions

Estonia mobile energy storage power wholesale price

Overview

Average wholesale prices were €90-87/MWh in 2023-24, but retail rates vary by contract. (As examples, fixed-price offers in late 2023 were ~13-14 c/kWh, while dynamically-priced packages can average lower or higher depending on market fluctuations.) How much does electricity cost in Estonia?

A paid subscription is required for full access. In September 2024, the average wholesale electricity price in Estonia amounted to 84 euros per megawatt-hour. Between January 2021 and August 2022, electricity prices in the Baltic country increased by nearly seven-fold, reaching more than 360 euros per megawatt-hour in the latter month.

Why do Estonians have electricity plans?

Most Estonians have electricity plans linked to the current spot price, enabling them to respond to hourly price fluctuations and manage their consumption more efficiently. Estonia is an active participant in the European Union's electricity market. This integration is pivotal for the country's energy policy and market dynamics.

How will a battery energy storage park work in Estonia?

The battery energy storage park and its substation will be connected to the electricity transmission network using a 330kV AC underground cable, marking a first in Estonia. Baltic Storage Platform confirmed that the BESS will seek to ensure the stability and resilience of the Estonian electricity grid.

How much energy does Estonia use?

Estonia's all-time peak consumption is 1591 MW (in 2021). In 2021 the electricity generated from renewable energy sources was 29.3 %, being 38% of the share of renewable energy in gross final energy consumption. Oil-based fuels, including oil shale and fuel oils, accounted for about 80% of domestic production in 2016.

What is the largest power plant in Estonia?

The largest power complex in the country, Narva Power Plants, consists of the world's two largest oil shale -fired thermal power plants. The complex used to generate about 95% of total power production in Estonia in 2007. Falling to 86% in 2016 and 73% in 2018.

What is Estonia's energy landscape?

Estonia's energy landscape is distinct, with a significant portion of its electricity generated from oil shale. This abundant natural resource has historically been the backbone of the country's energy production. While oil shale remains a major energy source, Estonia is gradually diversifying its energy mix.
