

SolarInvert Energy Solutions

Estonian energy storage power production company

Overview

Estonian energy company Eesti Energia opened the Baltic's largest battery storage at the Auvere industrial complex. This state-of-the-art storage system is already enhancing the stability of the regional electricity grid and mitigating high peak electricity prices for consumers. Where is Estonia's largest battery storage facility located?

The flagship battery storage project commenced operations on February 1, only days before cutting ties with the Russian power grid. Estonian state-owned energy company Eesti Energia has inaugurated the nation's largest battery energy storage facility at the Auvere industrial complex in Ida-Viru County.

How will a battery energy storage park work in Estonia?

The battery energy storage park and its substation will be connected to the electricity transmission network using a 330kV AC underground cable, marking a first in Estonia. Baltic Storage Platform confirmed that the BESS will seek to ensure the stability and resilience of the Estonian electricity grid.

What is the largest power plant in Estonia?

The largest power complex in the country, Narva Power Plants, consists of the world's two largest oil shale -fired thermal power plants. The complex used to generate about 95% of total power production in Estonia in 2007. Falling to 86% in 2016 and 73% in 2018.

What is the main source of energy in Estonia?

In 2014 Estonia's primary energy production exceeded 244 thousand TJ with over 77 percent produced from shale oil and 18 percent from wood. Estonia energy demand is satisfied through domestic production (70 percent) and imported supplies, mainly natural gas and both gasoline and diesel oil (30 percent).

What makes Estonia a digital powerhouse?

According to Freedom House, this country also enjoys one of the most significant economic, press, and Internet freedoms globally. The secret of being a digital powerhouse lies in the pioneering advances made by its government under its innovative e-Estonia initiative – fostering innovative education, virtual business, and digital citizenship.

How does Eesti Energia's battery work?

According to Eesti Energia board member Kristjan Kuhi, the battery is able to respond very effectively to fluctuations in the power system. “This modern capacity significantly reduces the costs of balancing the Baltic electricity system and thus the end price for the consumer,” Kuhi said.
