# Failure to collect electricity charges for communication base stations in a timely manner

## Overview

---

Why do charging stations fail?

But sometimes charging stations themselves lack the diagnostic capabilities to differentiate one cause of failure from another, or they're using communications and software links that aren't equipped to pass more detailed information on to the charging network operations platform or its customers.

Can a bi-level optimization model maximize the benefits of base station energy storage?

To maximize overall benefits for the investors and operators of base station energy storage, we proposed a bi-level optimization model for the operation of the energy storage, and the planning of 5G base stations considering the sleep mechanism.

Why does a base station have a low power load?

Therefore, when the electricity price was at its peak, the base station system had a low power load and would discharge to the grid in part of the time. Conversely, when the electricity price was at its low, the base station system had a high power load.

What factors affect communication coverage of a base station?

The communication coverage of a base station is closely related to transmitting power, frequency, and other factors. When the frequency of a base station increases and the transmitting power decreases, its coverage decreases.

What happens when a base station is in active state?

1) When the base station is in active state, its power loss  $P_{active}$  consists of transmitting power  $P_{tx}$  and inherent power  $P_{fix}$ . With an increase in the communication load of the base station, the corresponding transmitting power  $P_{tx}$  increases linearly.

Can federal agencies hold EV charging network operators to specific metrics?

Though federal agencies may not be able to hold charging network operators to specific targets for metrics other than uptime, the rules that accompany the \$ 5 billion in federal funding for public EV chargers do encourage companies to get better at collecting this sort of data.
