How many savant power storage 20 batteries can be installed?

Each Savant Power Storage 20 Battery can support up to two Savant Power Inverters, allowing for an increased solar capacity. The cabinet and modular battery tray design make installation faster and simpler. Up to eight Power Storage 20s can be installed for 160 kWh of combined storage.

Why should you choose a battery based energy storage system?

By sourcing batteries separately, users can expand their energy storage capacity as needed without overhauling the entire system. This scalability makes it an ideal solution for both residential and light commercial applications, future-proofing investment and enabling smart energy management.
