# France 110 Energy Storage Project

## Overview

---

Who is delivering a battery energy storage system in France?

China's Envision Energy has been selected by Kallista Energy to deliver a 120 MW/240 MWh battery energy storage system (BESS) in Saleux, northern France. The project represents Envision's first independent storage contract in the French market and signals its continued European expansion.

What is France's biggest energy storage project?

France's installed base of grid-connected energy storage systems so far is not vast, meaning that the Dunkirk project, while modestly-sized compared to numerous projects around the world, is thought to be the biggest project in the country so far.

Does France have a battery storage system?

Some of France's island territories have got fairly sizeable battery storage systems to underpin their local energy autonomy, but in continental France, development is still at a relatively early stage compared to say, Germany or the UK.

How big is France's energy storage capacity?

Global energy storage capacity was estimated to have reached 36,735MW by the end of 2022 and is forecasted to grow to 353,880MW by 2030. France had 90MW of capacity in 2022 and this is expected to rise to 359MW by 2030. Listed below are the five largest energy storage projects by capacity in France, according to GlobalData's power database.

Where is the largest battery-based energy storage facility in France?

Paris, December 21st, 2021 – TotalEnergies has launched the largest battery-based energy storage facility in France. Located at the Flandres center in Dunkirk, this site, which responds to the need for grid stabilization, has a power capacity of 61 MW and a total storage capacity of 61 megawatt hours

(MWh).
