

SolarInvert Energy Solutions

French energy storage battery procurement project

Overview

PARIS, FRANCE (20 June, 2025) – Envision Energy, a global leader in green technology for, wind turbines, energy storage, and green hydrogen solutions, announced today that it has executed an EPC (engineering, procurement and construction) agreement to supply 120 MW / 240 MWh Lithium Iron Phosphate (LFP) battery energy storage project in Saleux, located in the Hauts-de-France region of France for Kallista Energy, a European renewable energy producer. What is Envision Energy's first independent battery energy storage contract in France?

After previous triumphs in Europe, this project represents Envision Energy's first independent battery energy storage contract in France. Envision Energy will provide a minimum of a 14-year long-term maintenance (LTSA) agreement, starting construction in June 2025, ensuring ongoing presence in the area once the construction phase is complete.

Who is delivering France's largest battery energy storage system?

The news was released by Bloomberg this morning. Leading battery storage developer Harmony Energy is set to deliver France's largest battery energy storage system (BESS)—the Cheviré battery project – using Tesla Megapack technology.

What does Harmony Energy do for France?

Harmony Energy CEO for France Andy Symonds said: “Developing and operating vital battery energy storage facilities across France, will lead to enhanced energy security, more affordable energy bills, and the decarbonisation of the grid. We are excited to commence building works on our first project.”.

Is France a key market for Envision Energy?

Henry Peng, Senior Vice President and President of Latin America and European Region, Envision Energy, stated: “France is a key market for Envision Energy as we expand our presence across Europe, and our

partnership with Kallista Energy marks a significant milestone in this journey.

What is tagenergy doing in France?

“TagEnergy is proud to announce this flagship project in France, just weeks after connecting the first phase of the Southern Hemisphere’s largest wind farm in Australia and the UK’s largest transmission-connected battery”, said Franck Woitiez, CEO of TagEnergy.

What makes envision a good energy storage company?

Built with a strong emphasis on proven design, safety, and long-term reliability, Envision’s energy storage products are engineered for secure and dependable performance across their lifecycle, supporting the transition to a flexible, resilient, and net-zero energy future.
