

SolarInvert Energy Solutions

French energy storage investment projects

Overview

Five projects totaling 20 MW will deliver new battery storage capacity across France. The portfolio enhances grid flexibility, local resilience, and supports EU decarbonization goals. Is TotalEnergies the biggest battery storage project in France?

The energy major has 103MW of capacity market contracted energy storage online or coming online in France. Interestingly however, despite presiding over the single biggest project in the country, TotalEnergies sits second in Clean Horizon's chart of France's most prolific (publicly announced) battery storage project owners and developers.

How big is France's energy storage capacity?

Global energy storage capacity was estimated to have reached 36,735MW by the end of 2022 and is forecasted to grow to 353,880MW by 2030. France had 90MW of capacity in 2022 and this is expected to rise to 359MW by 2030. Listed below are the five largest energy storage projects by capacity in France, according to GlobalData's power database.

Can energy storage be used as a virtual transmission asset?

Transmission operator RTE has already engaged in some trial activities through which storage is being deployed in continental France. One is Project Ringo, which gauges the effectiveness of energy storage as a virtual transmission asset.
