

SolarInvert Energy Solutions

French household outdoor solar integrated machine

Overview

Are solar panels a good investment in France?

As electricity prices continue to soar in France - up 60% in four years - more people are turning towards solar panel kits, which promise to help users save on energy costs and installation prices. The estimated extra cost of electricity in 2024, compared to 2020, is €540 per household per year.

Can a balcony Solar System be installed in France?

France has been slower to adopt balcony solar regulations, but recent changes have made it easier to install systems up to 350 watts without complex administrative procedures. Spain introduced new regulations in 2020 simplifying the process for small-scale solar installations, including balcony systems.

Are balcony solar systems a viable solution for apartment dwellers?

With over 70% of Europeans living in urban areas, many in apartments, traditional rooftop solar installations are often not feasible. Balcony solar systems have emerged as an innovative solution, allowing apartment dwellers to generate renewable energy without extensive roof space or building modifications.
