# Georgia environmentally friendly solar system prices

## Overview

---

How much do solar panels cost in Georgia?

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average Georgia homeowner needs a 12.35 kW solar panel system to cover their electricity needs, which comes out to \$31,703 before incentives. Prices range from \$26,948 to \$36,458, but after the federal tax credit, that drops by 30%.

Can a solar power system lower your electricity bill in Georgia?

On average, a solar power system in Georgia can lower your electricity bill and pay for itself over time. Below you can see power generation, cost, and savings of different system sizes. Go Solar for less than your cell phone bill. Purchasing solar panels is no small task. Here are a few ways you can pay for solar:.

Is Georgia a good state to install solar panels?

With higher than average electricity prices and abundant sunshine, Georgia's a pretty great state for solar energy. It may not have the best local solar incentives, but as a Georgian, you can still take advantage of solar's most valuable incentive, the Federal Tax Credit. Here's what you should know about installing solar panels in the Peach State.

How much does a 5 kilowatt solar installation cost in Georgia?

Currently, the average price of 5-kilowatt solar installation in Georgia is between \$13,500 and \$12,733. That is the price before you claim the 30% federal tax credit. After the tax credit, the price comes down to about \$9,423, which equals approximately \$2.55 per watt.

Does Georgia have a solar rebate program?

As of January, Georgia doesn't have any local incentives or rebate programs. However, Georgia Power will buy back the excess energy a solar panel system

creates at a rate less than the retail cost of energy.

What tax credits do solar panels get in Georgia?

The federal solar investment tax credit (ITC) is the biggest factor reducing the cost of going solar in Georgia. If you install a residential solar panel system by the end of 2032, you receive a federal income tax credit equal to 30% of the system's total cost. That includes equipment, labor and permits.
