

## SolarInvert Energy Solutions

# Georgia installs solar power for home use

## Overview

---

Is Georgia a good state to install solar panels?

With higher than average electricity prices and abundant sunshine, Georgia's a pretty great state for solar energy. It may not have the best local solar incentives, but as a Georgian, you can still take advantage of solar's most valuable incentive, the Federal Tax Credit. Here's what you should know about installing solar panels in the Peach State.

How much do solar panels cost in Georgia?

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average Georgia homeowner needs a 12.35 kW solar panel system to cover their electricity needs, which comes out to \$31,703 before incentives. Prices range from \$26,948 to \$36,458, but after the federal tax credit, that drops by 30%.

How do I choose a solar power company in Georgia?

Look for a solar power company experienced in Georgia installations so that you have the most energy-efficient solar power system in place for your home. Many companies offer flexible financing options, including power purchasing agreements (PPAs), to lighten the financial burden of solar panel installation.

Does Georgia Power offer solar?

From home installation and our buy back program, to non-installation options, our goal is to make solar an option for every Georgia Power customer. Learn more about our behind-the-meter solar programs, including the new Renewable and Nonrenewable Resources (RNR) program, and how to interconnect your system.

Does Georgia have a solar incentive program?

Georgia does not have any statewide incentive programs but there are

programs through local communities or utility companies that can help homeowners finance solar. These include the Central Georgia EMC Home Plus Loan Program and the Georgia Power Home Energy Improvement Program.

Does Georgia Power Company offer a solar extension program?

The Public Service Commission Order pertaining to Dockets 4822, 16573, and 19279 states that Georgia Power Company is to provide existing solar participants the option to extend the term of their current Distributed or Utility Scale generation for up 35 years. Please select from the following options for more information surrounding your program.
