Are 48 volt batteries worth it?

This maximizes system lifetime and minimizes total cost of ownership (TCO). 48-volt batteries also offer the advantage that they can be maintained by anybody after a short safety briefing from us and do not require any certified high-voltage training.

Are lithium phosphate batteries environmentally friendly?

Lithium phosphate batteries are considered more environmentally friendly due to their non-toxic and more recyclable materials. LIXI offers modular components including 16x individually replaceable battery cells allowing easy maintenance.

Why do you need a lithium battery?

Our advanced lithium batteries are designed to meet electricity demands of modern life, offering unmatched safety, longevity, and efficiency. In combination with hybrid inverters, you can cover your daily electricity needs without having to rely on increasingly expensive, unreliable grid power. DE WEBSITE
