

SolarInvert Energy Solutions

German photovoltaic energy storage cabinet production company

Overview

How can a German company sell photovoltaic products in the European Union?

Innovative PV sales strategies, system configurations and integration processes - including storage and demand management - are intrinsic components of the specialist expertise being developed in Germany. International companies wishing to sell photovoltaic products in the European Union must fulfill established quality and safety requirements.

Are solar photovoltaic modules safe in Germany?

In Germany, solar photovoltaic modules are certified according to European Norm (EN) standards. Manufacturers must comply with the "safety class II" norms that certify the electrical safety of photovoltaic modules.

Is Germany a good place to invest in solar energy?

The photovoltaic industry is playing a key role in shaping Germany's sustainable energy future. Germany can look back on decades of solar energy experience and is considered as being a major photovoltaics pioneer. Germany is the biggest and fastest-growing rooftop solar PV market in Europe.

Are rooftop PV systems paired with battery storage in Germany?

In 2019, 46% of all commissioned residential rooftop PV systems had already been paired with battery storage systems. Remarkably, this share surged to 77% in 2023, indicating a significant upward trajectory of the trend toward combining PV residential rooftop systems with battery storage in Germany.

How many battery storage systems are installed in Germany?

Battery Storage Boom: 1.2 Million Systems Installed Notably, battery storage systems, also essential for Germany's renewable energy transition, constitute a significant component of this ecosystem, with 1.2 million installed systems.

Is battery storage a trend in Germany?

Remarkably, this share surged to 77% in 2023, indicating a significant upward trajectory of the trend toward combining PV residential rooftop systems with battery storage in Germany. To date, most battery storage systems in the German electricity system have been used exclusively to optimize self-consumption.
