# Greek energy storage lithium battery factory

## Overview

---

Can a battery storage plant be built in Greece?

An increasing number of local and foreign companies are interested in building energy storage facilities in sun-loving Greece using battery technology. In fact, the Regulatory Authority for Energy (RAE) has been receiving applications for permits concerning battery storage plants.

Where are lithium ion batteries made?

There will also be further expansion of the assembly plants in Verona, Italy and North Carolina, United States. The €20m for lithium-ion batteries will also see an assembly line for prototyping and R&D purposes alongside the three production lines for off-road mobility, industrial use, and Energy Storage for renewables.

How much money is being invested in lithium-ion batteries?

An additional €20m is being invested in the production of lithium-ion batteries, with the installation of three highly automated assembly lines for lithium modules and complete lithium battery systems, as well as one assembly line for prototyping and R&D purposes.

Will Greek oil refiners be able to transition to climate neutrality?

The Greek oil refiner has announced EUR 4 billion in investments to support its transition to climate neutrality, with a heavy focus on storage and renewables. All these groups now await a ministerial decree that would allow the Independent Power Transmission Operator (IPTO) to provide connection terms.
