## Overview

---

How much did electricity cost in Greece in July 2024?

Baseload electricity prices in Greece amounted to 135 euros per megawatt-hour in July 2024. Electricity prices skyrocketed in Europe between the second half of 2021 and the first half of 2022, and Greece was strongly affected.

Is electricity cheaper in Greece?

The price of electricity in Greece is cheaper than the European average, even if the country is facing a huge price increase in 2022. The rate of your bill will depend on the supplier and the offer you choose to subscribe to.

How is Greece transforming its energy system?

Greece is undergoing a major transformation in how it generates, delivers, and prices electricity. From a fossil-heavy past to a renewable-powered future, the country is embracing a cleaner and more competitive energy model—driven by policy, market innovation, and consumer choice.

What happened to Greece's electricity prices in 2022?

The monthly average electricity baseload price in Greece's day-ahead market (DAM) peaked at 436.5 euros per megawatt-hour in August 2022, roughly quadrupling in comparison to a year earlier. In the second half of 2022 and in 2023, prices started to decline, although they were still not at the pre-pandemic level as of July 2024.

How do I pay my electricity bills in Greece?

To pay your bills, you can either log in directly to your online account, or: DEH: DEH (DEI) is the public electricity company of Greece. The majority of Greeks have a contract with this company, but more and more are turning to independent companies with better offers. It is neither the cheapest nor the most competent.

What are Greek electricity bills?

Greek electricity bills include: Supply Charge – The actual cost of energy (can be fixed or variable). Network Charges – Regulated fees for using transmission and distribution lines. Public Service Obligations (PSOs) – Costs to support islands, renewable energy, and vulnerable consumers.
