

## SolarInvert Energy Solutions

# Grenada Wind Solar and Energy Storage Project

## Overview

---

The Public Utilities Regulatory Commission (PURC) of Grenada is inviting expressions of interest (EOIs) for a renewable energy project at the island nation's main international airport. The project aims to increase Grenada's reliance on renewable energy and reduce its dependence on fossil fuels. How can Grenada achieve a sustainable future?

3.1. Intensify the diversification of generation mix and develop the potential of Grenada's indigenous energy resources (geothermal, wind, solar), increasing the share of electricity generated by renewable energy sources, in conjunction with the pledged climate mitigation efforts and the gradual phasing out of fossil fuels 3.1.a.

Does Grenada have electricity?

Electricity. Grenada has established a legal framework for the accelerated development of the supply of electricity from renewable energy, through the Electricity Act No19 of 2016 (amended in 2017) and the PURC Act No20 of 2016 (amended in 2017). The electricity subsector is currently under transformation.

What role do governance and institutional reforms play in Grenada's energy sector?

Governance and institutional reforms play a central role in the development of Grenada's energy sector: effective functional institutions working in coordination are a key ingredient for the successful deployment of sustainable energy, ensuring the adequate and transparent allocation of funds to achieve the policies.

Why does Grenada need a cleaner transport system?

The Government recognizes the need to shift to cleaner and more efficient transport means and fuels. The goal is for transport in Grenada to become drastically less polluting.

How can Grenada become less polluting?

The goal is for transport in Grenada to become drastically less polluting. A combination of measures addressing emissions, congestion, and improved public transport will be explored to phase out fossil fuels consumption in transport, with one main solution emerging: electric vehicles.
