

## SolarInvert Energy Solutions

# High-Performance Photovoltaic Panel Price

## Overview

---

How much does a photovoltaic panel cost?

Mainstream Photovoltaic Panels: Average price of €0.10/Wp, down 9.1% month-on-month. Low-Cost Photovoltaic Modules: Average price of €0.060/Wp, a decrease of 7.7% compared to the previous month. These figures underscore the significant pressures in the photovoltaic market, as price reductions strain margins to unprecedented levels.

Why should you choose high-performance solar panels?

Higher efficiency means better sunlight-to-energy conversion, which means more electricity production and bigger savings on your power bill. Choosing high-performance solar panels isn't just about going green. It's about maximizing your return on investment (ROI) and cutting long-term energy costs.

How much does a photovoltaic module cost?

Mainstream Modules: Average price of €0.11/Wp, stable compared to September but 21.4% lower than January 2024. Low-Cost Modules: Average price of €0.065/Wp, a 7.1% decrease from September and 27.8% from January 2024. These trends are exerting mounting pressure on the photovoltaic sector.
