# Home Energy Storage Product Management

**ESS**

**40.96kWh**

**61.44kWh**

## Overview

---

What is a home energy management system?

The goal of a home energy management system is to cover the energy demand of a household while minimizing costs and/or emissions. Typically, a HEMS reduces costs and emissions by maximizing the utilization of renewable energy as it aligns consumption with times when renewable energy is available. Every household has its individual needs.

Why should you choose Honeywell energy storage solutions?

Discover how Honeywell's energy storage solutions can help provide technology, software and services to better optimize operations, support energy efficiency goals and enable cost savings. 40+ years of continued innovation in energy and control systems and SCADA for power industry.

Why should you invest in energy storage solutions?

Solutions that can support you improving your energy storage operations, empower your workforce with advanced tools and provide actionable insights and visualization to enhance efficiency and help you achieve your energy storage goals. Technologies to help expand the supply of sustainable aviation fuel.

How sigenergy smart home system works?

You can effortlessly connect smart loads and configure their operation modes and run times within the app. Every operation is highly graphical and user - friendly, enabling everyone to enjoy a green and smart life. In Sigenergy smart home system, you have highly flexible and personalized control rights.

Why should utilities rethink their energy management strategies?

In many markets, the grid infrastructure is under strain – both from an increasing demand for electricity 1 and extreme weather events causing outages. 2 This requires utilities – as well as commercial and industrial

organizations – to rethink their energy management strategies.

Is cloud-based energy management possible without a local gateway?

Cloud-based energy management is also possible without a local gateway, however, this is less prevalent and has increased latency. Software and applications compatible with the hardware to control, monitor and access the DERs in a household.
