

SolarInvert Energy Solutions

Home solar smart power generation system

Overview

What is a smart home solar system?

Simply put, a smart home solar system is one that goes above and beyond simply delivering renewable energy. It takes care of itself, and you in the process. The Enphase Energy System brings solar, batteries, and software together in one complete package so now you can make, use, save, and sell your own power—all through a smart mobile app.

Can solar energy be integrated into a smart home?

Solar energy fits perfectly with the established goals of a Smart Home. It provides users with insight into their energy usage and control over their energy production, dovetailing nicely with the goals of many Smart Home devices which seek to conserve energy and reduce waste.

What does solar energy provide in a smart home?

Solar fits perfectly with the established goals of a Smart Home, providing a user with insight into their energy usage and control over their energy production. It's time to start incorporating solar energy into the design of a modern Smart Home.

What is SolarEdge home?

SolarEdge Home is the smart energy ecosystem that lets you produce and manage energy. From award-winning inverters and batteries, to EV chargers and smart energy devices, you can produce more power, and use it in more places, than ever before.

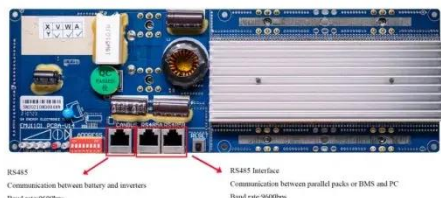

Can solar power make a smart home sustainable?

To achieve a sustainable model for the Smart Home, it's time to bring solar power to the table. An IoT (Internet of Things) capable Smart Home requires a lot of power to operate, and where that energy comes from should be part of the conversation.

Is solar a good option for a smart home?

When it comes to Smart Home tech, solar has one distinct advantage: it pays for itself over time. As you generate solar energy and save on your monthly energy bill, you'll watch as the savings pay off the system.

 **Efficient
Higher Revenue**

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 150% Peak Output Power
- 2 MPPT Trackers, 150% DC Input Overloading
- Max. PV Input Current 15A, Compatible with High Power Modules

 **Intelligent
Simple O&M**

- IP65 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection

 **Flexible
Abundant Configuration**

- Plug & Play, EPS Switching Under 10ms
- Compatible with Lead-acid and Lithium Batteries
- Max. 6 units Inverters Parallel
- AFCI Function (Optional): when an arc fault is detected the inverter immediately stops operation
