

## SolarInvert Energy Solutions

# Household cost of solar power

## Overview

---

The average cost of solar panels ranges from \$2.50 to \$3.50 per watt installed, with most homeowners paying between \$15,000 and \$35,000 for a complete system before incentives. After applying the 30% federal tax credit, net costs typically range from \$10,500 to \$24,500. How much does a solar panel system cost?

The overall price for a solar panel system, including installation, falls between \$13,000 and \$20,000 for a 6-kW setup and can rise to as much as \$40,000 for a larger system.

How much does solar power cost in 2025?

Take control of your energy costs with solar power. Solar panels generate “free” electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in 2025.

How much does a commercial solar system cost?

Commercial solar installations are a great way for companies to lower energy costs. Generally, installing solar panels on businesses costs a bit less per watt because the systems are larger, but the total costs will be higher. In 2025, the average cost for commercial solar panels is just about \$2.00 per watt.

How much does home solar cost?

The average pre-incentive cost of home solar is \$29,161 for a three-bedroom house, or \$20,412 after claiming the 30% tax credit. However, as shown in the chart below, the number of bedrooms isn't a great indicator of the size and cost of a solar system – and neither is living space, for that matter.

How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's “cost

per watt” is a little like the “price per square foot” when you buy a house. It helps compare the value of solar energy systems in different sizes.

How much does a 12 kW solar panel cost?

The average cost of a 12 kW solar panel installation on EnergySage is \$20,754 after the federal tax credit. You'll probably save anywhere from \$34,000-\$120,000 over 25 years by going solar. Solar panels are just 12% of the total cost of a solar panel installation.
