Household energy storage prices in Hungary

Overview

How much does electricity cost in Hungary?

The average price of electricity in Hungary, in June of 2023, has been 0.1161€ per kilowatt hour. Electricity price has increased € 0.0077 kWh, 7.1% since the previous semester. Meanwhile, the average price of electricity without taxes in Hungary in that period was € 0.0914 per kilowatt hour, compared to € 0.0853 kWh in the previous semester.

How much gas is stored in Hungary?

Much less gas is being stored in Hungary at present than in the previous two years in mid July. According to a diagram from the office of energy affairs, the capacity in 2020 was 5.4 bcm and 4.5 bcm in 2021, while this year that figure stands at 2.84 bcm.

What percentage of Hungary's consumption is in storage facilities?

FM Szijjártó recently stated that 28.5 percent of Hungary's total annual consumption is in the country's storage facilities. This does not look good considering that roughly two-thirds of Hungary's consumption, 6 bcm, occurs in the period between November and March. Holoda, however, interprets the situation differently.

Is Energy cheaper in Hungary?

There are countries that have protected their utility bills less from the world market, yet energy is cheaper than the Hungarian government claims. The government media communicates about HUF 242 (EUR 0.61) for electricity and HUF 912 (EUR 2.3) for gas, while on the free market you can buy cheaper, reports atlatzso.hu.

How much of Hungary's energy consumption should come from res?

Under Hungary's National Action Plan for the Utilisation of Renewable Energy 2010-2020 (NAP), 14.65% of Hungary's primary energy consumption by 2020

should come from RES. This target is more ambitious than the commitment made by Hungary under the RES Directive 4 , which was 13%.
