# How many base stations does Armenia Power have

## Overview

---

Armenia has a total of 11 power stations and 17 220 kV substations. A map of Armenia's National Electricity Transmission Grid can be found at the website of the Global Energy Network Institute [here](#) [1]. How many power stations does Armenia have?

Armenia has a total of 11 power stations and 17 220 kV substations. A map of Armenia's National Electricity Transmission Grid can be found at the website of the Global Energy Network Institute [here](#) .

How much energy does Armenia need?

It has been an observer to the Energy Community since 2011 and a member of the Eastern Partnership since 2009. Although Armenia's energy demand averages more than 3 Mtoe (3.59 Mtoe in 2020) and the country does not produce any fossil fuels, it manages to cover 27% of energy demand with domestic energy production.

How does Armenia produce electricity?

Armenia lacks fossil energy source, and heavily relies on the production of electricity from a nuclear power plant and hydro power plants, and uses imported fossil fuels to operate thermal power plants. Solar energy and wind energy productions are just a small portion of the overall electricity production.

Where can I find a map of Armenia's national electricity transmission grid?

A map of Armenia's National Electricity Transmission Grid can be found at the website of the Global Energy Network Institute [here](#) . Nuclear power provides 38% of the electricity in Armenia through one operating nuclear reactor, Unit 2 of Metsamor Nuclear Power Plant, which is a WWER-440 reactor with extra seismic reinforcement.

How many power plants does Armenia have?

The country also has eleven hydroelectric power plants and has plans to build a geothermal power plant in Syunik. Most of the rest of Armenia's electricity is generated by the natural gas-fired thermal power plants in Yerevan (completed in 2010) and Hrazdan.

What are the main energy sources in Armenia?

Since 1996 three main energy sources for electricity generation in Armenia were natural gas, nuclear power and hydropower. Despite a lack of fossil fuel, Armenia has significant domestic electricity generation resources.
