

## SolarInvert Energy Solutions

# How many power base stations are there in Angola

### Utility-Scale ESS solutions

## Overview

---

With a current installed capacity of approximately 5,01 GW, three power stations primarily power Angola; Laúca (1000 MW), Capanda (520 MW) and Cambambe (960 MW), as hydroelectric plants generate nearly two-thirds of Angola's electricity. How many power plants are in Angola?

Generation Capacity With a current installed capacity of approximately 5,01 GW, three power stations primarily power Angola; Laúca (1000 MW), Capanda (520 MW) and Cambambe (960 MW), as hydroelectric plants generate nearly two-thirds of Angola's electricity. Meanwhile, the Luanda OCGT power plant is the only operating gas turbine in the country.

What is the power sector in Angola?

Revised in May 2023, this map provides a detailed view of the power sector in Angola. The locations of power generation facilities that are operating, under construction or planned are shown by type – including liquid fuels, gas and liquid fuels, natural gas, hybrid, hydroelectricity, solar PV, wind and biomass/biogas.

What is the electrical system in Angola?

Angola's electrical network is divided into six independent electrical regions (north, central, south, Cabinda, the east and isolated systems) but only the north and central grids are connected, while the connection of the central to the south is underway.

Which OCGT power plant is the only operating gas turbine in Angola?

Meanwhile, the Luanda OCGT power plant is the only operating gas turbine in the country. To meet rising demand, Angola will install 9,900 MW of capacity, with a focus on natural gas and hydropower.

How many transmission lines does Angola have?

Three transmission systems comprise Angola's national power grid. Through

400kv and 220kv lines, the northern grid encompasses the provinces of Luanda, Uige, Bengo, Zaire, Malange, Kwanza Norte and Kwanza Sul. The central grid runs 400 kV lines from Benguela to Bie and Huambo, while the southern grid covers Huila and Namibe through 220kv lines.

Can Angola reach 60 percent electricity access rate by 2025?

To reach a 60 percent electricity access rate by 2025, the Angola Energy 2025 Vision will augment transmission capabilities through the extension of the electrical grid to urban areas, as well as the promotion of decentralization solutions to provide energy services to rural and off-grid populations.
