# How much do photovoltaic panels cost in Indonesia

**2MW / 5MWh**  
**Customizable**

## Overview

---

Solar panel prices have fallen 89% in the last 10 years. Read here to find out the current price of home solar installation in Indonesia! .

Here's a rough estimate of the standard system cost for landed homes in Indonesia. Remember that installation costs will also vary depending on the above factors. So, how much does it cost to install solar panels in Indonesia?

The cost depends on.

A 1 kWp installation could cost up to Rp14-24 million. In addition to the size of the desired capacity, the price is also determined by various factors, such as the complexity of the installation, the structural reinforcement needed, and others. Can solar panels be used in Indonesia?

Even though the potential and benefits of solar panel technology are enormous, its implementation in Indonesia faces many challenges, including inadequate infrastructure, low public understanding of the technology, and so on. Development of Indonesian Solar Panels.

How much does solar PV cost in Indonesia?

The tool calculates an IRR of 16.44%, and a pay-back period of 6 years. IEA estimated that in 2019, Solar PV installations in Indonesia had an LCOE of 80 US\$/MWh. This compares with an IRENA estimate of the worldwide average of 60 US\$/MWh in 2019, falling to 48 US\$/MWh in 2021.

What are the best solar panels for landed homes in Indonesia?

The most popular solar panel brands in Indonesia are typically the more affordable top Chinese manufactured panels in the list such as LONGi, Jinko, Trina, JA Solar, etc. Here's a rough estimate of the standard system cost for landed homes in Indonesia. Remember that installation costs will also vary depending on the above factors.

How to rent solar panels in Indonesia?

b) SUN Rental A rental financing scheme based on the performance of solar

panels, based on hourly calculations without down payment (DP) or upfront installation costs. You can make monthly payments for 15-25 years. As an illustration, the average time the sun shines optimally in Indonesia is 4 hours.

How much does a 1 kilowatt solar panel cost?

The basic price for a 1-kilowatt peak (kWp) of solar panels is around Rp. 14 million. The total cost will depend on how big the solar panels are to be installed. For example, if a house or shop installs 10 kWp of solar panels, you need to multiply it by the base price per kWh, and the result is IDR 140 million.

Do solar panels generate electricity if it rains in Bali?

Be it in Bali, Lombok or other areas, solar panels will still generate some electricity even when it's cloudy or raining, but significantly less—up to 90% less in heavy cloud cover. It is important to note that solar panels do not store any electricity. That is what batteries do and you can opt to add them to your system.
