How much does a 5kw off-grid solar power system cost

Overview

On average, a 5 kW solar panel system costs \$13,550, according to real-world quotes on the EnergySage Marketplace from 2025 data. However, your price may differ—solar costs can vary significantly from state to state. How much does a 5 kW solar panel cost?

On average, a 5 kW solar panel system costs \$13,550, according to real-world quotes on the EnergySage Marketplace from 2025 data. However, your price may differ—solar costs can vary significantly from state to state. The table below should give you an idea of what you can expect to pay for a 5 kW solar panel system in your state.

How much does an on-grid solar system cost?

On-grid systems are built to support energy needs but do not serve as your only electricity source. This means they're smaller and cost less than off-grid options. The average cost of solar panels for an on-grid, 5 kilowatt-hour (kWh) system is \$15,000–\$20,000. An off-grid system costs more than twice as much.

How much do off-grid solar panels cost?

On average, off-grid solar panels cost about \$55,000 but can range from \$20,000 for smaller, older panels to \$100,000 and more for bigger, more complicated systems. Being armed with this information is a key starting point in figuring out how to go off-grid, what you'll need in order to pull it off and how much you might have to pay.

How much does a solar system cost?

Most homes need a 5- to 10-kW system to generate enough energy for a standalone solar power system. For comparison, a 5- to 10-kW grid-tied solar panel system costs \$15,000 to \$45,000 installed on average. Get free estimates from solar panel installers near you. What are off-grid solar systems?

Can a 5kw solar system save you money?

One of the most significant advantages of a 5kW solar system is its ability to save you money on electricity bills. On average, this system can save you up to \$1,551 per year. Over the 25-year lifetime of the solar panels, the total savings can amount to an impressive \$38,781. The rising cost of electricity is a major concern for many homeowners.

Is a 5kw Solar System a good option?

For those seeking to disconnect entirely from the grid, a 5kW off-grid solar system is an alternative worth considering. To achieve a self-sufficient off-grid setup, you would need to purchase 17 or more panels and approximately 32 kWh worth of lithium polymer batteries to ensure a full cycle.
