# How much does a Costa Rican energy storage battery cost

## Overview

---

How much does electricity cost in Costa Rica?

Electricity in Costa Rica is not cheap, with an average of USD 28 cents per Kw/hr. Currently, ICE is betting on the increase of imports and the use of Electric Vehicles in order to increase consumption, as many of its large companies have been decreasing consumption due to the installation of solar solutions.

Who sells solar panels in Costa Rica?

American firms have a strong presence in Costa Rica by selling their products through local distributors or joint ventures. The main competitors of U.S. businesses in the solar area in Costa Rica are Chinese brands. Most companies selling solar systems are local companies that assemble Asian solar panels with some U.S. made components.

Are EV charging stations in Costa Rica a good idea?

EV Charging stations have been installed throughout the country, but supermarkets and other businesses are installing EV chargers for their clients. Currently, the best prospect for U.S. companies in Costa Rica is long-term accumulative batteries and EV chargers.

Does Costa Rica have a monopoly on electricity?

The Costa Rican Institute of Electricity (ICE) holds a monopoly over electricity distribution and generation in Costa Rica. There are some exceptions where other public institutions, private companies (Law #7200) and co-operatives are authorized by law to generate and sell electricity.

Why should you invest in Costa Rica?

Costa Rica's presents opportunities for solar and distributed generation, long-term accumulative batteries and electric vehicle chargers.

Who are the competitors of US solar companies in Costa Rica?

The main competitors of U.S. businesses in the solar area in Costa Rica are Chinese brands. Most companies selling solar systems are local companies that assemble Asian solar panels with some U.S. made components. The main area of competition for American companies is with the accumulative batteries used in the solar equipment.
