

## SolarInvert Energy Solutions

# How much does a photovoltaic panel cost per piece

## Overview

---

Solar panels cost between \$0.30 and \$0.90 per watt without labor and other fees. Since your typical solar panel system size is 6.5 kW, anticipate spending around \$3,900 for the panels alone, or somewhere between \$1,950 and \$5,900. How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

How much does a 12 kW solar panel cost?

The average cost of a 12 kW solar panel installation on EnergySage is \$20,754 after the federal tax credit. You'll probably save anywhere from \$34,000-\$120,000 over 25 years by going solar. Solar panels are just 12% of the total cost of a solar panel installation.

How much does it cost to install and manage solar panels?

According to studies by the U.S. Department of Energy, the all-in cost of a home solar panel system is between \$2.74 to \$3.30 per watt. 1,2,12 This figure includes the solar panels, the installation, and other expenses.

How much does a CPV solar system cost?

Concentrated photovoltaic (CPV) panels are \$0.80 to \$1.10 per watt. While not as well-known as other types of panels, CPV panels are highly efficient and may grow in popularity. A 6 kW solar system would cost \$4,800 to \$6,600. A single solar cell costs about \$0.30 and most panels use 60 or 72 cells. The more cells in a panel, the higher the cost.

How much does it cost to clean solar panels?

Solar panels require very little upkeep. If you're able to clean the solar panels

yourself, the only maintenance cost will be the water used to hose them down. If you hire a professional to clean your solar panels, it will cost around \$100 to \$350, on average.

How efficient are solar panels?

The average solar panel is around 21% efficient, according to the Center for Sustainable Systems (CSS). However, most residential solar panels range from 18% to 22%. Commercial and utility solar panels can have much higher efficiencies, as much as 24%, while some lower-quality solar panels may have slightly lower efficiencies of around 17%.
