How much does it cost to buy a 2kw solar system

Overview

On average, a 2 kW solar panel system costs \$6,360, according to real-world quotes on the EnergySage Marketplace from 2025 data. However, your price may differ—solar costs can vary significantly from state to state. How much does a 2 kilowatt solar system cost?

A 2 kilowatt (kW) solar system will typically cost between \$3,000 and \$4,500 after the solar rebate, depending on the efficiency of the solar panels. The number of solar panels required to generate 2 kW of energy will vary depending on the efficiency of the panels.

Can a 2KW solar system save you money?

Investing in a 2kW solar system can lead to significant savings on electricity bills. On average, this system can save up to \$621 per year. Over the 25-year lifetime of the solar panels, the total savings can amount to \$15,513. It is important to consider the rising cost of electricity when evaluating the potential savings of a 2kW solar system.

How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

How much does solar power cost in 2025?

Take control of your energy costs with solar power. Solar panels generate “free” electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in 2025.

How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's “cost per watt” is a little like the “price per square foot” when you buy a house. It helps compare the value of solar energy systems in different sizes.

How much electricity does a 2 kW solar system use?

The cost of electricity where you live is the most significant determinant of your solar savings. The table below shows average estimated electricity production numbers for 2 kW solar energy systems in cities across the U.S. By comparison, the average household in the U.S. uses 893 kilowatt-hours (kWh) a month, which equals 10,715 kWh per year.
