# How to install a battery storage cabinet at home

Voltage range: 691.2-947.2V

>6000 cycles (100%DOD)

Rated battery capacity:  
216KWH (customizable)

EMS communication:  
4G/CAN/RS485

## Overview

---

Battery storage allows you to store electricity generated by solar panels during the day for use later, like at night when the sun has stopped shining. While batteries were first produced in the 1800s, the types of battery storage systems that can store solar power and provide electricity to households are fairly new.

The significant reduction in the cost of battery storage systems in recent years means that installing a battery is fast becoming a viable option for many Australian.

Battery storage uses a chemical process to store electrical energy, which can then be used at a later time. For example, a solar-powered torch stores.

When purchasing a battery storage system it is important to discuss your needs with a system designer. They will help you choose the best way to set up your.

(Manufacturer BESS\*) OFF-THE-SHELF SYSTEM These systems are typically all-in-one systems that require little customisation to be installed.

How do I install a battery storage system?

install battery storage systems  
**INSTALL YOUR SYSTEM**  
The first thing to do when having a battery storage system installed is to ask to see the installer's Clean Energy Council Accredited Installer card. This shows that the install.

Should I invest in a battery storage system?

consider before you invest in a system for your home. Installing a battery storage system\* can provide a number of benefits when used in conjunction with an existing or new solar panel system. The overall system that is constructed for your home or business is called a 'battery energy storage system'. For the purpose of this guide.

How long does it take to install a battery storage system?
