# How to use Huawei's emergency communication mobile base station

**2MW / 5MWh**  
**Customizable**

## Overview

---

What is a Huawei base station?

Let's dive into a technical explanation. A base station, also known as an eNodeB (for 4G LTE) or gNodeB (for 5G NR) in Huawei's terminology, is a piece of equipment that facilitates wireless communication between user equipment (UE) like smartphones, tablets, and IoT devices, and the core network of the telecommunications provider.

How to make an emergency call on a Huawei Smartphone?

The Huawei smartphone can make an emergency call and also send an SOS SMS to selected contacts that contains information about your location. For this you have to press the on / off button 5 times in quick succession. Note: In this guide, we activate emergency help with an SOS message and add a contact (multiple contacts are possible).

What is Huawei base station backhaul microwave?

Based on leading wireless, transmission, and datacom technologies, Huawei base station backhaul microwave solution provides fiber-level broadband wireless backhaul capabilities, ultra-low latency, fully modular architecture design, and co-site integration with wireless networks.

Does Huawei offer a microwave transmission solution?

Huawei provides multiple microwave transmission solutions, such as base station backhaul, backbone/enterprise private line, video upload, and AirFlash train-to-ground dump, which are designed for large-bandwidth, low-latency, and multi-scenario transmission on industry private networks.

What systems does Huawei offer?

Huawei provides comprehensive management and control systems, such as Huawei's U2000 or Huawei's Cloud BTS. These systems enable operators to monitor, configure, and manage base stations remotely, ensuring optimal

network performance and reliability.

Does Huawei microwave support radar sensing?

On top of this, it also supports radar sensing. Huawei's enterprise microwave solutions include microwave transmission and radar sensing, the first of which is based on Huawei's leading 5G wireless technologies.
