

## SolarInvert Energy Solutions

# Huawei 10W photovoltaic inverter

## Overview

---

Why should you buy a Huawei sun2000 10kTL inverter?

Thanks to these integrated MPPTs, the Huawei SUN2000-10KTL inverter maximizes the efficiency of the solar panels so that the investment made is amortized more quickly since maximum energy is offered to the home at all times depending on the number and type of solar panels installed and the solar radiation they are receiving.

What is Huawei sun2000 10kTL-M1 solar inverter?

Sale! Huawei SUN2000-10KTL-M1 is an innovative solar inverter solution for solar installations with a connection to 3-phase network with or without a battery. Its compact design with reduced size offers flexibility in its installation. It incorporates LCD screen for easy control and monitoring in real-time.

How much power can a solar inverter use?

Recommended max. PV power 1 \*1 Inverter max input PV power is 20,000 Wp when long strings are designed and fully connected with SUN2000-450W-P power optimizers. \*2 The maximum input voltage is the upper limit of the DC voltage. Any higher input DC voltage would probably damage inverter.

Why should you invest in a 10 kW solar inverter?

Investing in one makes you tension-free about power failure, scheduled load shedding, and high electricity bills. 10 KW solar inverter is the optimal solution for a family house and depending on your geographical location will help you produce the amount of electricity needed to cater needs of your family.

What is the most powerful inverter?

This inverter is, within the domestic three-phase KTL range, the most powerful model available. The Huawei SUN2000-10KTL-M1 10kW Inverter has a power of 10,000W and 11,000VA, as well as a maximum output current of 16.9A,

making this inverter an excellent option for small three-phase installations.

What is Huawei 3-phase grid-connected inverter?

This inverter is an intermediate model within the new residential range of Huawei three-phase grid-connected inverters. This inverter incorporates 2 MPPT that allow the installation of the panels in two groups so that each of the groups can be installed with a different inclination, orientation or with different electrical characteristics.
