

SolarInvert Energy Solutions

Huawei Togo inverter

Overview

Is Huawei a good inverter manufacturer?

In 2018, Huawei entered the home photovoltaic inverter market with a very successful product at a competitive price. Two years later, Huawei introduced the second generation of home hybrid inverters. Huawei is a Chinese consumer electronics, IT equipment, and solutions manufacturer founded in 1987 and headquartered in Shenzhen.

What is a second generation Huawei inverter?

The second generation of Huawei inverters hit the market in April 2020, two years after the first. The SUN2000-L1 series covers powers from 2kW to 6K, features two MPPT inputs and an operating voltage range from 100V to 600V. The SUN2000-L1 model is a hybrid inverter ready to connect to an energy storage facility.

What is Huawei on-grid solar inverter?

In conclusion, the Huawei On-Grid Solar Inverter series, spanning from 2kW to 6kW, embodies the company's commitment to innovation, efficiency, and sustainability in the solar energy sector.

Do Huawei inverters enable Island operation?

Huawei inverters enable island operation to a limited extent. In addition to energy storage, island operation also requires the so-called back-up box. Thanks to the back-up box, in the event of a power grid failure, the inverter switches to island operation. After the failure is removed, the inverter switches to on-grid operation.

Can a Huawei inverter be used under a photovoltaic module?

Optimizers can be used under selected PV modules, and optimizers can be installed under each photovoltaic module. Huawei inverters even have a built-in IV voltage- current curve tester. Huawei inverters are equipped with the PID

recovery function, which limits the degradation of photovoltaic modules by the PID phenomenon.

How long does a Huawei inverter last?

Depending on your region and specific model, these inverters typically come with warranty periods ranging from 5 to 10 years. This warranty not only provides peace of mind but also demonstrates Huawei's confidence in the durability and performance of its products.
