# Huawei s photovoltaic inverters are banned in Cameroon

## Overview

---

Could Huawei solar inverters be a threat to the power grid?

The debate mirrors the 2019 US ban on Huawei solar inverters, which cited potential remote control threats to the power grid, particularly during wartime.

Why did the US ban on Huawei inverters?

The 2019 US ban on Huawei inverters was driven by fears that adversaries could remotely disrupt critical applications like home electricity and electric vehicle charging. Although Huawei has exited the US market, other Chinese manufacturers have filled the gap, offering cost-competitive products that continue to dominate globally.

Are China-made photovoltaic inverters a cybersecurity risk?

Europe is grappling with growing concerns over the cybersecurity risks posed by Chinese-made photovoltaic inverters, prompting discussions about restricting high-risk suppliers from connecting to its power systems.

How Huawei inverters are changing people's lives in Cameroon?

Huawei inverters are built to provide durability and reliability at levels unmatched in the rest of the industry. But see for yourself how in Cameroon, Huawei technology is changing people's lives. The media could not be loaded, either because the server or network failed or because the format is not supported.

Why has Huawei defended its solar inverters?

Huawei has defended the security of its solar inverters in the wake of calls from a group of US senators for them to be removed from use in the States. The letter, released on Monday urged Congress to put in place action similar to that which blocks Huawei and fellow Chinese firm ZTE from providing telecommunications infrastructure.

## Should Chinese inverters be banned?

Critics argue that banning Chinese inverters could raise costs and disrupt supply chains, as European alternatives are 30-50% more expensive. The European Commission is assessing cybersecurity risks in the solar value chain, with the ESMC advocating for measures like Lithuania's 2023 ban on Chinese inverters.
