

## SolarInvert Energy Solutions

# Huawei s sodium ion energy storage export direction

## Overview

---

Will Huawei invest in sodium battery technology?

Earlier this year, Huawei filed another patent for composite cathode material, signaling its ongoing commitment to investing in sodium battery technology. Marija has years of experience in a news agency environment and writing for print and online publications.

What is Huawei's new patent for sodium-ion batteries?

On November 22, China's Huawei announced a new patent for sodium-ion batteries named "Electrolyte Additives and Preparation Methods, Electrolytes and Sodium-ion Batteries."

What is Huawei findreams sodium battery technology?

BYD and Huawei have joined forces to establish Huawei FinDreams Sodium Battery Technology, a joint venture focused on manufacturing, sales, and battery recycling. With a seed capital investment of 500 million yuan, the partnership aims to address the growing demand for sodium-ion batteries.

Are BYD & Huawei the future of energy storage?

BYD and Huawei are not far behind. Both firms are heavily investing in sodium-ion technology improvements. They recognize the importance of developing efficient, cost-effective alternatives to Lithium-ion batteries. Thus, their R&D efforts are promising for the future energy storage landscape. Sodium-ion technology offers numerous benefits.

Does Huawei invest in 'sodium batteries'?

Huawei takes action and invests in "sodium batteries"! Electric Zhijia news, on April 1, Zhongke Haina Technology Co., Ltd. underwent an industrial and commercial change. The shareholder added Shenzhen Hubble Investment, an investment company of Huawei, and the company's registered capital increased to about 30.95 million yuan.

Will the industry work together to promote the development of sodium-ion batteries?

“We hope that the whole industry will work together to promote the development of sodium-ion batteries,” said the battery maker.
