

## SolarInvert Energy Solutions

# Icelandic home energy storage system production

## Overview

---

A master plan comparing the economic feasibility and the environmental impact of the proposed power development projects is being prepared. It is hoped that this comparison will aid in the selection of the most feasible projects to develop, considering both the economic and environmental impact of such.

As a result of rapid expansion in Iceland's energy intensive industry, the demand for electricity has increased considerably during the last decade.

A licence issued by the National Energy Authority is required to construct and operate an electric power plant. The National Energy Authority is responsible for.
