

## SolarInvert Energy Solutions

# India photovoltaic container customization

**51.2V 300AH**

## Overview

---

What is a containerized solar PV system?

Powtech's Containerized Solar PV Solution utilizes innovative hybrid technology housed within a standard 20-ft marine container, delivering up to 10,000 kWh of energy annually. The system integrates solar panels positioned atop the container, boasting a power capacity range of 4 to 8 kWp, complemented by a reliable battery backup system.

Why should you choose a modular energy storage container?

Advanced monitoring systems and IoT integration ensure optimal performance and remote management capabilities. The modular design allows for easy expansion, with the option to expand the battery storage system by 100 - 500kwh, making our energy storage container perfect for meeting growing energy demands.

Are container homes a viable alternative to urban housing?

But perhaps more importantly, it offers an alternative to the resource-heavy way most urban housing is built today. Container homes aren't new — but The Habitainer's work shows how they can be adapted to an Indian context, and to real people's lives.
